RBI Launches new 500 and 2000 series banknotes – EduGeneral

As a security feature, this note had a metallic thread running through it, which was upgraded to a "windowed" thread from July 1988 onward. The thread is woven into the paper such that it forms a dashed line, yet appears as a single line when held up to the light. The series D note was gradually replaced by the series E, beginning in 1994.

Bank of England £50 note — Wikipedia Republished // WIKI 2

Feel: Raised Print On the front of the note you will feel raised print if you run your finger over: The numerical values at the top right and the large '20' in the centre of the note; The Clydesdale bank name, the words 'Twenty Pounds Sterling' and the promise to pay by order of the board

Clydesdale Bank

Security threads are now integrated into almost all banknotes, because they are versatile, easy to recognize, robust, and cost-effective. During the paper production stage, we embed them into the substrate - either fully covered by the paper or as a window thread that is visible on the surface of the paper at regular intervals.

Security Threads | G+D - gi-de.com

Although this threat has been contained, with high-tech security features making euro banknotes secure and easy to distinguish from counterfeits, vigilance is necessary to discourage counterfeiting, professional cash handlers in banks, retail companies, restaurants and in other businesses where large amounts of cash are handled have to be familiar with euro banknotes and coins.

Security features in the euro banknotes

The security thread is visible as a solid silver line on both the front and back of the note and runs from the top to the bottom of the note between the 1 and 0 of the number 10. Look: See Through There is a clear polymer window on the centre left of the note when viewed from the front.

Danske Bank

Security Thread: The machine-readable security thread in Rs.10, Rs.20 and Rs.50 denomination banknotes is windowed on front side and fully embedded on reverse side. The thread fluoresces in yellow on both sides under ultraviolet light. The thread appears as a continuous line from behind when held up against light.
